

## SMART NITROGEN

Don't let nitrogen be your limiting factor for healthy plant growth. Play it Smart with our slow and consistent methylene urea nitrogen that releases as your plant needs it.

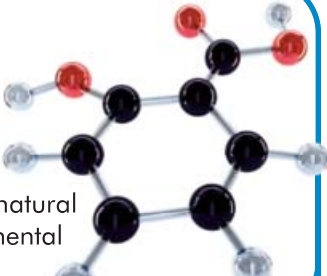

## BACILLUS SUBTILIS GB03

Unleash the powers of soil rhizosphere bacteria, *Bacillus subtilis* GB03, to control disease, improve your plants resistance to disease and stress, and promote overall plant and root growth.

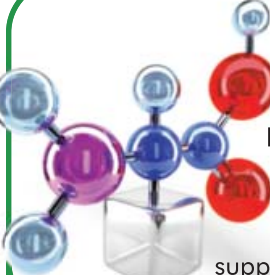

## HUMIC ACID

Take a holistic approach with Humic Acid, the most concentrated organic substance, producing beneficial plant growth and improved soil fertility with its auxin like properties. A crucial ingredient to a thriving crop.

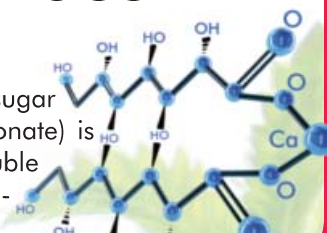

## SALICYLIC ACID

An aspirin a day to help boost the plant's immune system, and trigger its natural defenses against environmental stress, insects and disease.

## AMINO ACIDS

Building blocks of all living things. Supplement your crop during rapid growth phases and under times of stress to support healthy, vigorous growth.

## CALCIUM GLUCOHEP- TONATE

All things considered, a sugar acid chelate (glucoheptonate) is best for the most soluble micronutrients, for immediate release.
